ÉTIENNE COMPÉRAT

Predoctoral Fellow in Economics, University of Zurich

Website | GitHub | LinkedIn | E-Mail

Research Interests: Economic History, Political Economy, Spatial and Regional Economics

Education

Sciences Po 2023–2025

M.Res. in Economics, PhD Track. Thesis (16/20): "Enrichissez-vous!": Education, Suffrage, and Local Development in July Monarchy France. Awarded Sciences Po Prize for Best Master's Thesis.

University of California, Berkeley 2022–2023

Full-Year Exchange Program, B.A., Dept. of Agricultural & Resource Economics GPA: 4.0

Sciences Po 2020–2023

B.A. in Economics and Political Science *Cum laude*

Research Experience

Predoctoral Fellow in Economics | University of Zurich July 2025–Present

Supervisor: Hans-Joachim Voth

- Build reproducible historical data pipelines from archival, textual, administrative, and geospatial sources for a project set in Revolutionary France; conduct historical geocoding and GIS integration.
- Contribute to computer-vision workflows for historical images, including preprocessing, labelling, supervised model training, feature extraction, and name extraction.
- Contributed reproducible code to the replication package for *Fighting for Growth*.

JPE Replicator | University of Chicago July 2025–Present

Data Editor: Florian Oswald

- Conduct independent replications of accepted *Journal of Political Economy* articles: verify tables and figures, review code, diagnose data and code issues, rebuild software environments, and prepare reports.

Research Assistant | Sciences Po Summer 2025

Supervisor: Roberto Galbiati

- Collected, transcribed, and cleaned archival donor records to construct an individual-level dataset on anti-Dreyfusard mobilisation in late nineteenth-century France.

EJ Replicator | Royal Economic Society 2024–July 2025

Conducted reproducibility checks for accepted *The Economic Journal* articles under editorial supervision.

Research Assistant | Sciences Po; UC Berkeley; CEPREMAP 2023–2024

- Constructed and documented administrative and historical datasets from police reports, press sources, death notices, French customs reports, and well-being-economics sources.

Methods & Programming

Empirical methods: causal inference, panel data, spatial analysis, text analysis, computer vision.
Historical data: archival data construction, historical GIS and geocoding, OCR, web scraping, record linkage.
Programming: Python, R, Stata (advanced), Julia (intermediate).
Tools: Git, LaTeX, QGIS, Google Vertex AI, reproducible workflows.

Graduate Coursework

Core: Econometrics I–III; Macroeconomics I–III; Microeconomics I–II. **Fields:** Economic History; Political Economy; Urban & Regional Economics; International Trade; Demography. **Computational:** Dynamic Programming; Incomplete-Market Models; Numerical Solution Methods.

Languages

Native: French | **C2:** English | **C1:** Italian | **B1:** German
