ÉTIENNE COMPÉRAT

PhD Student in Economics, Sciences Po

Website | GitHub | LinkedIn | E-Mail

Research Interests: Economic History, Political Economy, Spatial and Regional Economics

EDUCATION

PhD in Economics | Sciences Po 2026–Present
Advisors: Roberto Galbiati, Kevin O'Rourke

M.Res. in Economics, PhD Track | Sciences Po 2023–2025
Thesis Committee: Roberto Galbiati, Emeric Henry (advisors), Kevin O'Rourke GPA: 4.0
Master's Thesis: "*Enrichissez-vous ! Education, Suffrage, and Local Development in July Monarchy France*"

Undergraduate Exchange Program | University of California, Berkeley 2022–2023
Department of Agricultural & Resource Economics GPA: 4.0

B.A. in Economics and Political Science | Sciences Po 2020–2023
Cum laude GPA: 4.0

RESEARCH EXPERIENCE

JPE Replicator | University of Chicago July 2025–Present
Data Editor: Florian Oswald

- Conduct independent replications of accepted *Journal of Political Economy* articles: verify empirical results and replication packages, review code, diagnose reproducibility issues, rebuild software environments when necessary, and prepare detailed reports for the Data Editor.

Predoctoral Fellow in Economics | University of Zurich July 2025–August 2026
Supervisor: Hans-Joachim Voth

- ***Untitled*** (with M. P. Squicciarini and N. Voigtländer): built historical data pipelines from archival, textual, administrative, and geospatial sources for a project on Revolutionary France; conducted historical geocoding, GIS integration, and historiographical research to inform data construction and coding.
- ***Image(s)*** (with D. Yanagizawa-Drott): contributed to the computer-vision workflow, including image preprocessing, labeling and validation, supervised model training, feature and name extraction, and appendix analysis of name norm-deviation.
- ***Fighting for Growth*** (with B. Caprettini and A. Trew): contributed to the documented replication package by writing clean and reproducible code for the empirical analysis.

Research Assistant | Sciences Po Summer 2025
Supervisor: Roberto Galbiati

- ***Dreyfus Affair: Polarization and Resistance during WWII*** (with S. Lauterbach and B. Marx): constructed an individual-level dataset from archival donor records on anti-Dreyfusard mobilization in late nineteenth-century France.

EJ Replicator | Royal Economic Society 2024–July 2025
Data Editor: Florian Oswald

- Conducted reproducibility checks of accepted *The Economic Journal* articles under editorial supervision, reviewing replication packages, code, data, and reported empirical results.

Research Assistant | Sciences Po Summer 2024
Supervisors: Roberto Galbiati, Aurélie Ouss

- Collected, cleaned, and documented individual-level administrative data from police reports, press sources, and death notices; conducted data-integrity checks and contributed to CNIL/GDPR compliance documentation.

Research Assistant | CEPREMAP Summer 2023
Supervisor: Mathieu Perona

- Constructed data on researchers in well-being economics and conducted background research for projects in cultural and well-being economics.

Research Assistant | University of California, Berkeley Spring 2023
Project on Arms Trade History (PATH)

- Extracted nineteenth-century arms-trade data from French customs reports (*Tableaux généraux du commerce de la France*) using archival microfilms, contributing to a historical database on the global arms trade.

TEACHING EXPERIENCE

Economics Tutor | Columbia University Fall 2026

- Provide individual and small-group tutoring on course material, problem sets, assignments, and exam preparation to Columbia and Barnard exchange students at Sciences Po; courses supported to date include *Behavioral Economics*, *Microeconomics: Information, Design, and Institutions*, and *Corporate Governance and Contract Theory*.

Teaching Assistant | Sciences Po Fall 2021
Instructor: Gretchen Allen Mestrallet
Comparative Political Institutions, first-year undergraduate course, taught in English

- Led tutorial and discussion sections for approximately 20 first-year students; prepared slides, discussion questions, and course summaries; taught methodology and exam-preparation sessions; conducted individual mock oral exams with feedback; provided academic support and supplementary materials by email.

METHODS & PROGRAMMING

Empirical methods: causal inference, panel data, spatial analysis, text analysis, computer vision.

Programming: Python, R (advanced); Stata, Julia (intermediate). **Tools:** Git, LaTeX, QGIS

Historical data: archival data construction, historical GIS and geocoding, OCR, web scraping, record linkage.

GRADUATE COURSEWORK

Core: Econometrics I–III; Macroeconomics I–III; Microeconomics I–II

Selected Fields: Economic History; Political Economy; Urban & Regional Economics; Labor Economics; Public & Environmental Economics; International Trade; Demography

Computational Economics: Dynamic Programming; Incomplete-Market Models; Numerical Solution Methods

Detailed coursework

ADDITIONAL EXPERIENCE

Assistant Project Manager | Agence Française de Développement Summer 2022

- Conducted economic and environmental analysis of transportation infrastructure projects in Pakistan.

LANGUAGES

French: Native | **English:** C2 | **Italian:** C1 | **German:** B1
